

MDLDD Microwave Leakage Detector; Dual Frequency (915 & 2450MHz)

- **Calibrated at 915 MHz and 2450 MHz**
- **Three Ranges**

Standard Configuration

- **Heavy Duty Carrying Case**
- **User Manual**

The model HI-1600 Microwave Meter measures microwave leakage from microwave devices operating at 2450 MHz or 915 MHz.

Three survey ranges are incorporated into a switching sequence that includes positions for battery and probe checks.

Specifications

Frequency Range:	915 MHz and 2450 MHz
Range, 2450 MHz:	0-10 mW/cm ²
Ranges, 915 MHz:	0-10 mW/cm ² , 0-20 mW/cm ²
Maximum Power Density	2.0 W/cm ²
Probe length:	30 cm (12 inches)
Cable length:	1.2 meters (4 feet)
Response time:	to 90% of final value for a step input -Fast: < 1 second. -Slow: < 3 seconds
